

Over the last several weeks, our dedicated staff continued to offer our patients curbside assistance with their hearing devices and saw other patients on an emergency basis. We have also implemented many protective measures in compliance with CDC guidelines to ensure patient safety.

We are continuing to service hearing devices curbside, for those who are needing repair services. Due to continued physical distancing requirements, we are not yet providing routine cleanings; however, if your device is not working appropriately, please call us and we will assist you curbside.

We are now seeing patients by appointment only for hearing evaluations, hearing devices appointments, wax removal, tinnitus evaluations/treatment, and auditory processing evaluations in our office.

Call us today for your appointment!
